

LED-Tester / Backlight Tester ~ 0 ... 300V DC ~ with Soft-Start

An extremely practical component tester for LEDs and other components. The device outputs an automatically raised output voltage between 0 to 300 V DC, which adapts to the connected load, so that the sensitive components are not destroyed. Especially suitable for the service and repair workshop.

- Output of automatic test voltage from 0V to 300V
- Suitable for testing individual LEDs or LED panels
- Suitable for testing the withstand voltage of electrolytic capacitors
- Suitable for Zener voltage testing of Zener diodes
- Robust plastic housing.
- LED display of the output voltage.
- Safety: EN 61010-1
- Accessories: Carrying case, Test Leads, Power Cable, Operation Manual

Output Voltage	0 - 300 V DC
Output Current	< 25 mA
Operation voltage	100 - 240 V AC, 50/60 Hz
Dimensions (WxHxD)	126mm x 77mm x 36mm
Weight	140 g
EAN-13	4250569404313
